

INTEGRATED MANAGEMENT SYSTEM POLICY

Our path is driven by the commitment to enhance the growth of our team, our community, our suppliers and our clients. This is the reason we immerse ourselves with all of our soul in the prosperity of everyone around us – because we are a part of each one of them.

Our activity is developed to create value in a sustainable way, contributing positively to improving the quality of life of present and future generations.

For that:

- We **promote** an integrated management of quality, innovation, environment, occupational health and safety, ethics, and social and financial responsibility as we consider them essential elements for continuous improvement and excellence in meeting the requirements of all interested parties;
- We **know, respect** and **comply** with legislation, standards, regulations and other applicable requirements and obligations considering the aspects inherent to the integrated management system in all the activities we carry out;
- We **maintain** a close relationship with all partners, working daily with great professionalism, seeking to anticipate and satisfy their expectations and needs;
- We **revolutionize** our industry through our innovative and creative capacity, developing more sustainable and innovative products and processes that meet the demands of the market and our customers, with the aim of creating value;
- We **promote** diversity to encourage different perspectives, develop innovative behaviors and maximize collective knowledge;
- We **protect** the environment by using resources consciously and efficiently, encouraging the optimization of their consumption, preventing, eliminating or minimizing our impact;
- We **identify** our main environmental concerns so that we can maximize our actions in terms of waste production and water and energy consumption;
- We **invest** in product and process certifications in order to guarantee and be recognized for high quality;
- We **ensure** a safe and healthy working environment for workers through the identification, assessment and control of risks, involving them in all parts of the process, facilities and environment;
- We **strive** for innovation and sustainability.
